

FirstCall Applications

FirstCall has many applications: around the home, in retirement villages and hostels, for people working alone, or for leisure activities.

If you cannot see your particular application here, please call FirstCall and let us try and solve your problem.

Living at Home

A FirstCall Medical Alarm will help you to live as long as possible in the safety and security of your own home.

Having a FirstCall alarm gives you peace of mind, knowing that help is close-by if you need it.

Many people ask us if FirstCall can protect them if they go down the back yard to feed the chooks, or when they are down in the shed.

FirstCall is designed to work around the average sized home and garden, but we can supply extra equipment which will extend the range of the FirstCall pendant. Please call us for assistance.

Retirement Villages and Hostels

FirstCall makes a very cost-effective Nurse Call System for retirement villages, hostels, community housing and all other types of residential care.

The FirstCall pendant can always be in reach of the resident and on-duty staff can talk back to the resident prior to attending, and determine the nature of the call

FirstCall can also be linked to an off-site monitoring service to take all calls, or back-up calls or after-hours calls only.

FirstCall can provide pendants, watches, fixed location call-points, environmental sensors and window and door detectors.

For a quotation for your residential care application please call FirstCall on **1300 40 80 80**

Lone Workers OH&S

Providing a FirstCall Medical Alarm in the workplace may assist companies to meet Occupational Health and Safety Requirements for lone workers.

Duress Alarm

Many people tell us that they have used their FirstCall alarm to frighten off intruders. The FirstCall alarm sounds a siren and then starts to dial the programmed phone numbers. The sound of the siren and the dialing has frightened intruders away.

The siren time can be extended to 40 seconds.

Take your FirstCall pendant with you whenever you answer the door.

You can use the pendant in the bath or shower. The pendant is waterproof to International Environmental Protection Standard IP67.

or when doing the Gardening

Everywhere you go around the Home, your FirstCall pendant can go with you.
